

Basic Chatbot - Python Program

Source Code

```
def chatbot():  
    print("Chatbot: Hello! Type 'bye' to exit.")  
  
    while True:  
        user = input("You: ").lower()  
  
        if user == "hello":  
            print("Chatbot: Hi!")  
        elif user == "how are you":  
            print("Chatbot: I'm fine, thanks!")  
        elif user == "bye":  
            print("Chatbot: Goodbye!")  
            break  
        else:  
            print("Chatbot: Sorry, I don't understand that.")  
  
chatbot()
```

Sample Output

```
Chatbot: Hello! Type 'bye' to exit.  
  
You: hello  
Chatbot: Hi!  
  
You: how are you  
Chatbot: I'm fine, thanks!  
  
You: bye  
Chatbot: Goodbye!
```
